

Currently my local Airl station provides me with Christian music, and national news. There are no other radio stations in my geographic area that have a program remotely smiliar to Airl, and I find it encouraging. Something that I can listen to with my whole family, and not be embarrassed or have to cover the ears of my kids. The loss of the Airl station would be detrimental to the local area, as there is so much trash on the other stations, they are not worth listening too.
